EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Adrian Calderone on September 30, 2005.

The application has been amended as follows:

Claim 3, line 3, replacing "0.78 ppm" to --7.8 ppm --.

2. The following is an examiner's statement of reasons for allowance:

The instant amended claims limit the xylene soluble fraction in the range of 0.4 to 0.6 wt.% and halogen content in the range of 7.8 to 10.1 ppm. The end points of the ranges are supported by the examples disclosed in the table of page 19, thus, the rejection under 35 USC 112, 1st paragraph rejection is overcome. Because the data listed in the table of page 19 have shown that homopropylenes, prepared by the claimed process, met the xylene soluble fraction and halogen content limitations have superior tensile modulus of elasticity, the claimed process is not an obvious variation over the cited prior art, Shinosaki (JP 07-025946) and Noristi (US 5,244,854).

In view of the foregoing, the instant claims are in the condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
